Sanjay Yadav

Mumbai, Maharashtra
8483088615 sy163182@gmail.com linkedin.com/in/sanjay-yadav-2813852ab github.com/sanjay-yadav-05

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL
Backend: NestJS, Node.js, Spring Boot, REST, GraphQL, Microservices, WebSockets
Frontend: ReactJS, Next.js, Tailwind CSS
Databases: MongoDB, PostgreSQL, MySQL
Tools: Docker, Kafka, Kong, AWS, GCP, Grafana, Prometheus, Newrelic, Postman

Experience

SDE **Oct 2025 – Present**
ClearN *Mumbai, Maharashtra*

- Debugged **client-side integration issues** where customers integrating our APIs into their own systems hit failures, diagnosing root causes in environments outside our control and resolving them to unblock production usage.
- Designed **REST and GraphQL APIs** (NestJS, TypeScript, MongoDB) with role-based access controls, powering backend services and transaction workflows for a FinTech platform used by school ERPs.
- Identified a single-JWT auth setup as a security risk and proposed and implemented an **access-refresh token** scheme, reducing exposure from long-lived tokens.
- Discovered that payment gateway **webhooks were unverified**, letting anyone with the endpoint URL forge payload data and update DB records; fixed this by adding **signature verification** before processing.
- Integrated **Cashfree, Razorpay, Easebuzz**, and banking payment providers into reusable gateway integrations supporting multiple payment modes, maintaining **PCI DSS-compliant** handling of payment data throughout checkout.
- Built **Auto Debit** subscription flows, **refunds, split payments**, and scheduled debit workflows.
- Own **payout and settlement workflows**: transaction processing, **reconciliation**, reporting, and fund movement, catching mismatches before they surface downstream.

DSA Expert **Jun 2024 – Jun 2025**
GDGC DBIT *Mumbai, Maharashtra*

- Led a 40-day **DSA bootcamp**, curated LeetCode/GFG practice material, and ran a HackerRank contest with **50+ participants**.
- Mentored **20+ participants** in Google Gen AI Study Jam, helping them design and ship their own **AI-based applications**.

Projects

Planify | *Next.js, FastAPI, PostgreSQL, LLMs* **Jul 2025 – Feb 2026**

- Built a **full-stack, multi-tenant AI event platform** with authentication, RBAC, and protected backend APIs.
- Designed a **microservices architecture** with **6+ AI services**, cutting manual event operations by **45%**.
- Built **multimodal ML pipelines** (PyTorch, CLIP, YOLOv8, NIMA) over 100+ images/videos, improving content-selection accuracy by **30%**.

CodeCraft | *MongoDB, Gemini, Ollama, WebSocket* **Mar 2025**

- Built a full-stack coding platform for **100+ users** with authenticated workflows, protected APIs, and **role-based access**.
- Integrated **Gemini and Ollama** for coding recommendations, hints, and automated challenge verification.
- Implemented **WebSocket-based** real-time coding battles supporting **50+ concurrent duels** with event-driven communication.

DSABUDDY | *React, JavaScript, CSS* **Mar 2024 – Apr 2024**

- Engineered an interactive platform to simulate **Data Structures and Algorithms**, with real-time code generation and visualizations that improved user engagement by **40%**.

Achievements

- **1st Place** – Debugging Marathon, GDGC, Pillai College of Engineering, Mar 2025.
- **1st Runner-Up** – Codeverse Hackathon, DBIT Mumbai, Mar 2025.
- **Top 10 Finalist & Adaptive and Promising Title Winner** – IDEA Hackathon, K.J. Somaiya College of Engineering, Mar 2025.

Education

Don Bosco Institute of Technology **Nov 2022 – Jun 2026**
B.E. in Computer Engineering ***– 8.6 CGPA*** *Mumbai, Maharashtra*
