Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL
Backend: NestJS, Node.js, Spring Boot, REST, GraphQL, Microservices, WebSockets, Redis, SQS, Kafka
Frontend: ReactJS, Next.js, Tailwind CSS, Figma
Databases: MongoDB, PostgreSQL, MySQL
Tools: AWS, Azure, GCP, Vercel, Grafana, Prometheus, Newrelic, Postman, Docker, Kong, cursor

Experience

SDE **Oct 2025 – Present**
ClearN *Mumbai, Maharashtra*

- Develop and maintain a **FinTech platform for school ERPs** across the **full stack**, building **REST and GraphQL APIs** with role-based access control in **NestJS, TypeScript, and MongoDB**, and the **ReactJS** interfaces for fee collection, Unified Payments Ledger, and payouts.
- Owned the **Auto Debit** feature for fee collection from solution design to client demo, covering the architecture, backend, frontend, and **end-to-end validation** of the full payment flow.
- Integrated **Cashfree, Razorpay, Easebuzz**, and banking providers as reusable gateway modules supporting multiple payment modes, **refunds**, and **split payments**, with **PCI DSS-compliant** handling of payment data.
- Own **payout and settlement** workflows, using **Redis and AWS SQS** to process refunds and payouts asynchronously, with **reconciliation** that catches mismatches before they reach downstream reporting.
- Hardened platform security by replacing a single-JWT setup with an **access-refresh token** scheme and adding **signature verification** to payment webhooks that previously accepted forged payloads.
- Perform **end-to-end testing** before every release and deploy to production through **AWS CodePipeline** and **Vercel**; currently contributing to the **cloud migration from AWS to Azure**.
- Debug **client-side integration issues** for customers integrating our APIs, tracing failures in environments outside our control to unblock production usage.

Projects

Planify – AI-Augmented Event Management Platform | *Next.js, FastAPI, PostgreSQL, LLMs* **Jul 2025 – Feb 2026**

- Developed a **full-stack, AI-powered event management platform** enabling end-to-end lifecycle management with multi-tenant architecture and role-based access control.
- Architected a **microservices-based system with 6+ AI services** using FastAPI, reducing manual event operations by **45%** through automation (team formation, talent scraping, report generation).
- Built **multimodal AI pipelines** processing **100+ images/videos**, leveraging PyTorch, CLIP, YOLOv8, and NIMA to improve content selection accuracy by **30%** and automate media generation.

CodeCraft – Learn, Practice & Battle | *Next.js, Node.js, MongoDB, Gemini, Ollama, WebSocket* **Mar 2025**

- Developed a **full-stack coding platform** enabling **100+ users** to learn, practice, and compete in programming challenges with real-time execution support.
- Integrated **Gemini + Ollama LLMs** to provide AI-powered problem recommendations, hints, and **automated challenge verification**, ensuring fairness and accuracy in evaluations.
- Implemented **real-time coding battles with WebSocket**, supporting **50+ concurrent duels** with minimal latency.

DSABUDDY | *React, JavaScript, CSS* **Mar 2024 – Apr 2024**

- Engineered an interactive platform to simulate **Data Structures and Algorithms**, enabling real-time code generation and intuitive visualizations that improved user engagement by **40%**.

Achievements

- **1st Place** – Debugging Marathon, GDGC, Pillai College of Engineering, Mar 2025.
- **1st Runner-Up** – Codeverse Hackathon, DBIT Mumbai, Mar 2025.
- **Top 10 Finalist & Adaptive and Promising Title Winner** – IDEA Hackathon, K.J. Somaiya College of Engineering, Mar 2025.

Education

Don Bosco Institute of Technology **Nov 2022 – Jun 2026**
B.E. in Computer Engineering – ***8.6 CGPA*** *Mumbai, Maharashtra*
