Experience

SDE **Oct 2025 – Present**
ClearN *Mumbai, Maharashtra*

- Design and maintain **REST and GraphQL** services in **NestJS, TypeScript, and MongoDB** across **5 production services / 14 repositories**, powering fee collection, the **Unified Payments Ledger**, and RBAC-backed **React** portals at **150K+ orders/month** and **100Cr+** volume; identified and improved auth security issues.
- Owned **Auto Debit** end-to-end (design → implementation → demo): mandate/subscription flows, scheduled debit execution, failure handling, and full payment-path validation.
- Built reusable integrations for **6 gateways** and **5 banks** (including **Cashfree, Razorpay, Easebuzz**) covering multi-mode payments, **refunds**, **split payments**, and **PCI DSS-compliant** data handling; improved **webhook signature verification**; run **refunds asynchronously** with **Redis and AWS SQS**.
- Participated in **system design** for **Payouts**: disbursement workflows, state transitions, and API/integration contracts for merchant-initiated transfers to beneficiaries.
- Improved **settlement reconciliation** to reduce ops time on mismatch resolution; optimized report pipelines for ∼**37%** faster average generation and shipped **sales/ops dashboards** that remove repetitive manual work.
- Partner with **ERP/school** and **gateway/bank** stakeholders on production issues and feature delivery; **23 ERPs** on tech support, **17** led, **8** taken live, including Auto Debit as a client-requested capability.
- Independently drive the **AWS** → **Azure** cloud migration: architecture decisions, execution, and validation.

Projects

Planify – AI-Augmented Event Management Platform | *Next.js, FastAPI, PostgreSQL, LLMs* **Jul 2025 – Feb 2026**

- Architected a **multi-tenant, RBAC event platform** for end-to-end lifecycle management on Next.js + FastAPI + PostgreSQL.
- Built **6+ AI microservices** automating team formation, talent scraping, and reporting, reducing manual event operations by **45%**.
- Built **multimodal AI pipelines** processing **100+ images/videos** (PyTorch, CLIP, YOLOv8, NIMA), improving content selection accuracy by **30%**.

CodeCraft – Learn, Practice & Battle | *Next.js, Node.js, MongoDB, Gemini, Ollama, WebSocket* **Mar 2025**

- Architected a **full-stack coding platform** (**Next.js, Node.js, MongoDB**) with interactive no/low-code tutorial modules, an in-browser playground, and streak-driven daily challenge scheduling for **100+ users**.
- Designed **WebSocket** matchmaking and real-time battle state sync supporting **50+ concurrent duels**, with skill-based progression and leaderboard aggregation.
- Integrated **Gemini + Ollama** for adaptive hints and automated challenge verification in the evaluation pipeline.

DSABUDDY | *React, JavaScript, CSS* **Mar 2024 – Apr 2024**

- Engineered an interactive **DSA learning platform** with real-time code generation and visualizations that improved user engagement by **40%**.

Technical Skills

Languages: TypeScript, JavaScript, Java, Python, SQL
Backend: NestJS, Node.js, Spring Boot, REST, GraphQL, Microservices, Redis, SQS, Kafka, WebSockets
Frontend: ReactJS, Next.js, Tailwind CSS, Figma
Databases: MongoDB, PostgreSQL, MySQL
Cloud & Tools: AWS, Azure, GCP, Vercel, Docker, New Relic, Grafana, Prometheus, Kong, Postman, Cursor

Achievements

- **1st Place** – Debugging Marathon, GDGC, Pillai College of Engineering, Mar 2025.
- **1st Runner-Up** – Codeverse Hackathon, DBIT Mumbai, Mar 2025.
- **Top 10 Finalist & Adaptive and Promising Title Winner** – IDEA Hackathon, K.J. Somaiya College of Engineering, Mar 2025.

Education

Don Bosco Institute of Technology **Nov 2022 – Jun 2026**
B.E. in Computer Engineering – ***8.6 CGPA*** *Mumbai, Maharashtra*
